HYDE HURTS!
The Hyde Amendment prohibits coverage of abortion care through federal health insurance programs such as Medicaid.

7.2M WOMEN
A total of 7.2 million women are denied access to abortion care each year because of the Hyde Amendment.

53% of Americans would support a bill requiring Medicaid to cover abortion in most circumstances.

50% of the 12 million potentially impacted by Medicaid coverage are women of color.

Despite this, the Hyde Amendment has been reinserted by Congress for 42 consecutive years.

HOW DOES THIS IMPACT WOMEN?

WHEN INSURANCE DOES NOT COVER ABORTION, WOMEN ARE FORCED TO:

- Take out loans
- Go into debt
- Sacrifice basic necessities such as rent, utilities, and food
- Borrow money from a friend
- Sell or forego care

WHEN A WOMAN WANTS TO GET AN ABORTION, BUT CANNOT, SHE IS...

- More likely to receive public assistance
- More likely to suffer anxiety and loss of self-esteem
- More likely to stay in an abusive partner
- More likely to achieve aspirational life plans

Let's fight for a future of dignity and respect, where our families can thrive and make decisions about pregnancy and parenting, however much money we make.
